Metreary—We notice by the Dixon (Lee county) Republics, that Capt. Wyman, formerly of this city, and recently elected Mayor of that young city, has organized a military company at that place. Some fifty young men have already pioned it, and the Captain is defiling them thoroughly. The efficiency and skill of the Chicago Light Guard is due in great part out in interestion of Capt. Wyman, and no letter officer can be found in the West.

AN STREET FOR BALL TO

Vather Currency, the head and spiritual director of the French colonists of Xuchal and † Arrows, Catholic Bishop of this Di-the controvers has arises which has been growing up among laymen, to what they regard as an infringement of their well defined rights of property. It is, in Tact, the reviews in Hitnois, of the Baffalo agitation by which the Church has been long convulsed. In this case, there is another element which in this case, there is another element which gives a tinge of hitternam and personality to the contest. Between the French Catholics and the Irish of the same faith, there is anything but a fraternal feeling. Father Chixquu represents the one nationality, and \(\frac{1}{2} \) Averages the other; and when the reader remembers that in the present dispute, the contending parties are animated by the spirit which makes all religious quarrels so intensely rancorous, as well as by the mutual antipathies growing out of differences of race, language, manners and hereditary methods of thought, they will readily agree with as that the struggle between them has but just commenced.

and to this day, he is remembered there with the selfection and reverence that characterist the feeling of the Irish, in Ireland, for Tuxonary Markisw. He left Caunda some years ago, after a succession of failures in the wheat grap, which had reduced the paradeases assess others to extreme want, in search of a more genial climate and a more fertile soil. He was accompanied by a large number of his friends, and though the colonists beasted of little westit and claimed but an bumble social position, they were rich in industry, frugality, contentment, love of their faith and of each other, in their new homes they have for years given full play to these virtues; and there is not now in all illinois a happier or more prosperous people. While they have been building their homes and gathering together such of the conflicts and histories as une within reach of those in their condition, Father Curvicer has been industrically engaged in promoting their spiritual wettare, in strictest accordance with doctrines and practices of their Church. He has built a house for their accommodation, has founded a school, has watched, with the selfettude of a father and the patience of good pricet, over their welfare. But their little church and they school have been nutil now, though both loyally Catholic, under their own control, and so they still desire them to remain. But that does not suit the Bishop; and here the quarrel begins. That dignitary—represented as grasping, avarietous and tyrannical, by his ensemies, and but feebly defended by his friends—demands the title to their colonistical property, the control of their chupational institutions, and their unqualified unbuilsion to such priess as he shall said them as the representatives of the will. Battled Currarquy refuses to obey, his people cling to him with the affection of children, and begin that their affairs, herstofore so happily guided, may be under his management still. The listop threatens them with the terrors of ecommunication; but they are independent in spite of hi

Four of Yellow Fever.

From the New York Freeing Foul.

Some time smort, the Governor appoint ghert Bension, George Hail and Obsail rown, commissioners to look up a few old post eits. What have they accomplished: New York of the the post eits. What have they accomplished from the theory for each is purpose; the yellow fever is forefile; theirly cases have just been sent to copital from the U.S. frigale Merriman, and to unlarged may reach this city any bour. It was the first the inquiry, What have the Commissioners done? What have the great the finding of the file of the commissioners done? What have the great the finding of the file of the city leath to commissioners done? The three the pay going to do guard the builth of the cit of day to the sun, in the present condition issioners doing?
Unless we wish to see the city depopulated postflence and fear, something should be one at once to protect as both from indigeness and foreign postflence. New York has vice been desolated by yallow fever. To all was a time.
